

# DECLARATION ON THE USE OF AI TOOLS

MANDATORY ATTACHMENT TO THE THESIS (TO BE INCLUDED IN THE  
SUBMITTED .ZIP FILE)

Name of the student: Md Farid

Neptun code: Wefkhb

Name of the study program: Computer Science BSc

Details of the submitted work:

Title: License Plate Recognition & Dynamic Pricing System

Type: BSc thesis

Name of the instructor/supervisor: Guettala Walid

One option must be selected in the declaration below.

I hereby declare that

☐ I did not use any artificial intelligence tools in the preparation of the submitted work.

☒ I used artificial intelligence tools in the preparation of the submitted work as detailed below.

| For what purpose?<br>(e.g. outlining,<br>processing literature,<br>AI development) | How was it used?<br>(e.g. validating AI<br>outputs, adapting them<br>to the task, revising<br>them, with a description<br>demonstrating critical<br>and creative use)                               | Which AI tool was used?<br>(e.g. ChatGPT 3.0,<br>Copilot, Grok) | In which part of the thesis?<br>(e.g. table of contents on<br>page 3, implementation) |
|------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|---------------------------------------------------------------------------------------|
| Resolving coding<br>errors                                                         | The tool was used to<br>assist in identifying bugs<br>in my project . Each<br>suggested fix was<br>independently evaluated,<br>tested, and adjusted<br>before being integrated<br>into the project. | Gemini                                                          | Source code (Frontend and<br>Backend )                                                |
| To get ideas on what<br>backend<br>areas to test.                                  | I got ideas on what to<br>test; the actual test cases<br>were written and run by<br>myself.                                                                                                         | Chat gpt                                                        | Code (Backend test files )                                                            |
|                                                                                    |                                                                                                                                                                                                     |                                                                 |                                                                                       |

|                                 |                                                                                                                                                                                         |        |                                          |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|------------------------------------------|
| Document formatting and styling | I used the tool to resolve LaTeX compilation errors and improve table formatting, and I personally reviewed all modifications to ensure the content accurately represents my own ideas. | Gemini | Thesis Documentation (LaTeX formatting ) |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|------------------------------------------|

*The table may be extended with additional rows.*

I hereby declare and confirm with my signature that:

- I take full responsibility for the content of the thesis.
- I have reviewed and understood the concept of plagiarism, and the provisions set out in [Sections 74/A–E of the Academic Regulations for Students](#) (Eötvös Loránd University Organisational and Operational Regulations – Volume 2) concerning the legal integrity of student work, and [Dean’s Instruction No. I/2026 \(III. 26.\) on the use of artificial intelligence in education, research, and administration](#).
- I have used only the AI tools listed in the table above in the preparation of the student work.
- I have not incorporated AI-generated text or code without verification and proper citation.

I acknowledge that:

- The direct use of AI-generated content presented as my own work, failure to comply with documentation requirements regarding its use, and making false declarations are considered equivalent to plagiarism.
- The text of my submitted work may be examined using plagiarism detection software after submission.
- In case of suspected plagiarism, the supervisor may verify, orally or in writing, whether the results reflect my own knowledge.
- In the event of plagiarism, my thesis/dissertation cannot be evaluated.
- In case of plagiarism, disciplinary proceedings may be initiated against me.
